

Illustration Golf car kit

****Align and apply the side section first.

It is optional to have the 2 sides meet in the center under the seat.

For Some owners a seam may be necessary in this location.

- * Fitment will vary depending on shape of golf car
- * Do not apply wet, air release wrapping film.

- * Lightly warming the kit on the corner can help you to curve the stripe around the center under the seat.

- *Once installed on the side over wheel well you can eliminate the transfer tape and work with the raw film to navigate around the corner to the center under the seat.

**Please follow the general instructions provided with your kit. Call with any questions prior to starting your installation.

If necessary you can cut the kit and do a slight overlap as an option.
